XM Radio has found a way to provide a higher quality product at a reasonable price. They have found a market that badly needed a service like this. The AM/FM stations have become incredibly bland. If I can even find a song or program playing among all the commercials at any given moment it's a miracle, and it is rare that I actually LIKE the song/program I find. None of the weather on the AM/FM dial are as in depth and ongoing as on XM. I PAY to have entertainment and information I LIKE at all times. I LOVE MY XM RADIO, PLEASE SUPPORT THEM. We are supposed to encourage new and better ideas in the United States. REJECT NAB's petition 04-160!Thank you.
